Where Will the #Cloud Take You?

Let's Find Out Together.

Microsoft Teams Cloud Telephony

The Hybrid Workforce Solution for Communication and Collaboration

Microsoft Direct Routing provides a PSTN connection to Microsoft Teams, allowing users to make and receive HD external phone calls. This solution is ideal for any hybrid, remote and onsite employees as it works on any Internet enabled device, from any location without compromising security.

Leading the Way for Enterprise Communication and Collaboration

This foundation of Unified Communications provides enterprise-wide technical equality for all employees and allows for replacement and removal of onsite hardware, costs/fees and ongoing maintenance duties. This "as a service" fully managed solution even integrates with Microsoft 365 apps, allowing for real time collaboration, communication, and policy management.

Microsoft Teams is integral in providing technical equality for all employees and in driving productivity across an entire company with multiple locations, through a familiar and best-in-class interface. Find out how Teams Calling via Direct Routing can provide employees the tools they need to succeed by offering a complete unified communications platform.
